Maritime Leadership, Safety and Soft Skill Online Courses

A collaborative learning approach

Our courses focus on leadership, safety and people performance, and include the soft skills that will qualify any leader at all levels. They have a significant impact on personal development, professional practice, safety culture and the ability to lead others.

The way we teach

We teach in a way that covers all the facets of learning — from understanding to application. Our creative and interactive training sessions ensure that participants are prepared, committed and actively engaged to learn and apply their new learnings as soon as they are back at their workplaces.

We use highly engaging methods where participants work in teams to explore and analyse industry-relevant and wide-ranging scenarios. We also utilise cooperative and reflective learning methods that enable brainstorming, creative thinking and deeply embedded learning to take place.

- Methods: Instruction, group discussions, multimedia, cases studies, and exercises

By working closely with our clients and participants, we can guarantee that the style of delivery of each course caters to the wide variety of individual and professional experience, as well as the cultural diversity within the shipping organisations around the world.

- Our facilitators are from the Philippines, Greece, Belgium, and Denmark.

Specific client needs

In addition to the course list below, we also provide tailor-made courses that target the specific needs of our clients. If you want a course designed specifically for your safety approach, leadership development or soft skill focus, you may contact us directly via www.urheadway.com

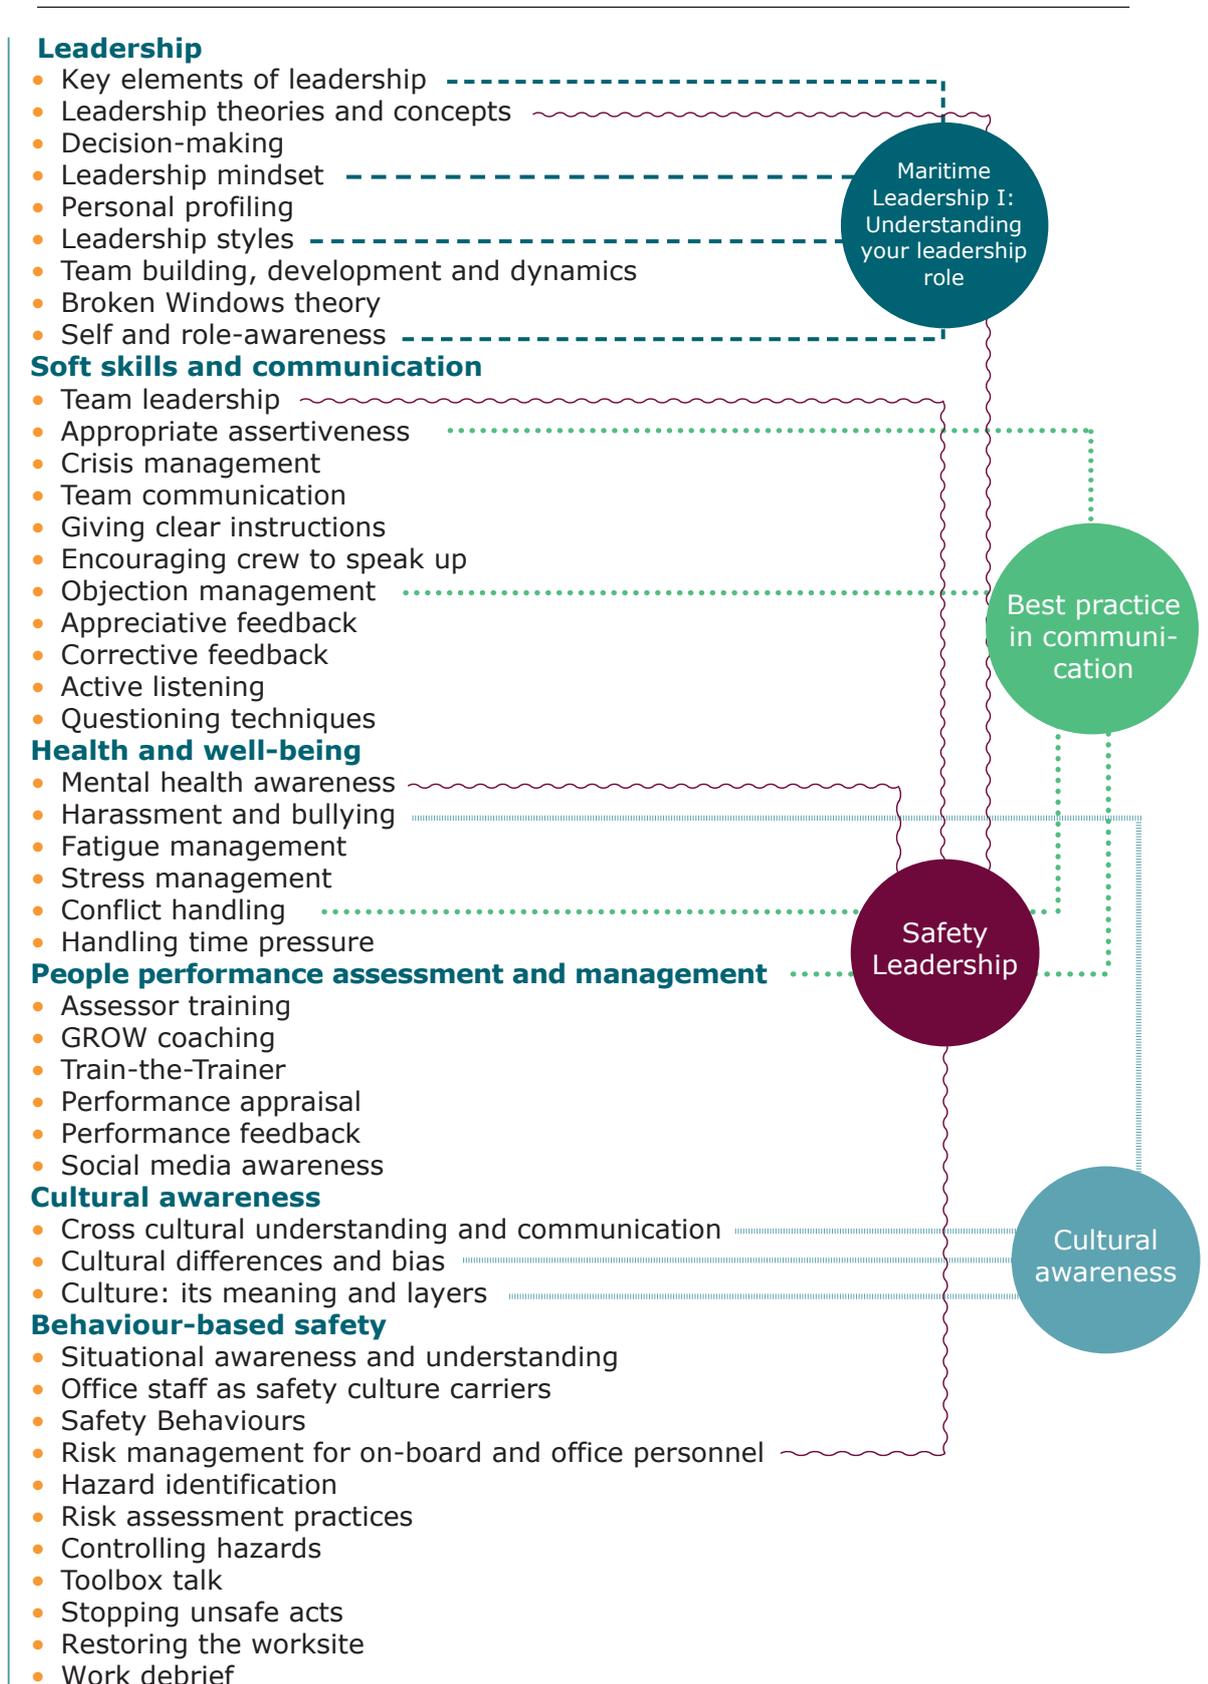

“ Let’s say I was prepared to have another waste-of-time course. To my surprise I participated in one of the best courses I have ever had. Besides that, the topic was so relevant and useful, the presentation skill of the instructor was extraordinary. He made us proactive from the beginning so much that I was enjoying the entire course. Thumbs up!”

– Technical Superintendent

Our wide selection of subjects provides flexible course solutions for ship and shore staff – you can choose and combine subjects to make up a course that suits and addresses your specific need.

RANGE OF SUBJECTS

IN-DEMAND COURSE COMBINATIONS

In short, this is our course profile

- Online, virtual classroom learning
- Facilitated live by facilitators with a maritime background
- Teach skills that go beyond compliance
- The courses fulfil industry requirements such as the TMSA
- Our soft skills training helps leaders drive employee performance
- Leaders become capable of making people follow
- Participants become aware of their contribution to an improved working environment
- We provide an understanding of a proactive safety culture and what it takes to contribute
- A high degree of participation by all ranks of seafarers and shore-based employees
- Tailor-made courses to suit your needs for subjects
- Reflective learning that changes human behaviour
